

Steve Arrants

Technical Writer & Documentation Engineer

South Burlington, VT | 802.881.1726 | greenmtdocs.com | linkedin.com/in/stevearrants | stevearrants@greenmtdocs.com

Summary

Documentation professional with 40 years of experience across SaaS, APIs, healthcare, and scientific software. Builds the systems, sets the standards, and brings the editorial judgment AI can't replace. Recent results: support ticket volume cut 40%, API error documentation reduced 70% without losing coverage, review cycles shortened 35%.

Tools & Skills

Authoring & publishing: MadCap Flare, Markdown, Git/GitHub/Azure DevOps, Jekyll, Hugo, MkDocs, Visual Studio Code

Platforms: Confluence, Intercom, AWS, Jira

Practices: Docs-as-code, single-source publishing, CI/CD integration, REST API and developer documentation, information architecture, style guide development, Agile workflows

AI & automation: Prompt engineering, LLM workflow integration, Claude Agent Skills authoring for structured content generation

Work Experience

Contract Technical Writer — iPaaS.com, Atlanta, GA

February 2025 – March 2026

API-first data integration platform serving mid-market and enterprise customers

- Designed a documentation overhaul to migrate content from an ad-hoc Intercom structure to a scalable, maintainable system aligned with product development cycles.
- Built and deployed three Claude Agent Skills (JSON-to-Markdown, mapping table generator, installation doc generator) that automate conversion of iPaaS JSON exports into publication-ready documentation—eliminating hours of manual formatting per integration.
- Reorganized 17 microservice API error files into a three-layer architecture, cutting volume by approximately 70% while improving navigability and maintaining completeness.
- Proposed a Markdown/Git/MkDocs/Intercom pipeline to replace Word/MadCap Flare, including a hybrid repo structure, phased adoption path, and cost-benefit analysis.
- Worked directly with Product and Development to establish content workflows and documentation standards across engineering teams.

Technical Writer (Expert) — Agilent Technologies, Inc., Winooski, VT June 2021 – August 2024

Global leader in life sciences and diagnostics, \$6B+ revenue

- Wrote technical documentation for 15+ hardware and software products, achieving 100% regulatory compliance across the portfolio.
- Rewrote, rebranded, and converted 12 documentation sets to new Agilent standards, restructuring content architecture while preserving technical accuracy.
- Introduced peer review frameworks and LLM-assisted editing workflows, cutting review cycles by 35%.
- Worked with agile development teams to streamline requirements gathering and accelerate content delivery.

Senior Content Developer — Jitterbit, Alameda, CA

July 2019 – June 2021

B2B SaaS/iPaaS cloud integration platform

- Reduced support ticket volume by 40% through targeted improvements to user guides and release notes—one of the highest-impact content initiatives in the company's history at the time.
- Wrote API documentation and system integration guides for a complex data integration platform serving both technical and business users.
- Established Agile documentation workflows using Confluence and docs-as-code approaches.

- Worked with engineers, architects, and support teams to keep SaaS product documentation accurate through rapid release cycles.

Sr. Content Developer and Technical Support Specialist — Sheridan Journal Services

Leading provider of content services for academic publishers — Waterbury, VT August 2014 – July 2019

- Built a knowledge base that reduced internal support queries by 60%.
- Wrote integration guides for publisher systems that cut client onboarding from four weeks to one and a half.
- Single-sourced Help for 16 clients, covering common and client-specific features from one content base.
- Directed documentation strategy for scientific data management and production software across a multi-product portfolio.

Writing Manager — Data Innovations, South Burlington, VT

March 2013 – July 2014

Medical laboratory data management solutions, \$75M revenue

- Led the technical writing team, establishing standardized documentation processes and source control practices.
- Cut documentation costs by 15% through single sourcing.
- Built metric-based documentation review frameworks adopted across the department.

Senior Technical Writer — MBF Bioscience, Williston, VT

March 2004 – March 2013

Developer of quantitative imaging solutions for science and medicine

- Introduced a print-on-demand documentation strategy that reduced production costs and turnaround time across a catalog of healthcare and scientific software.
- Managed documentation end-to-end—planning, writing, and maintenance—for eleven applications from a single content source over nine years.

Earlier Experience

Staff and contract roles at WebMD, iDrive,ROIDirect.com, CNET, Applied Business Technology, Autodesk, Reference Software, and Microsoft—covering consumer software, enterprise applications, e-commerce, and online help systems. Managed documentation teams of up to 20 writers and editors, including bi-coastal operations and two merger transitions.

At Microsoft (1986–1992), served on the User Education team for the Microsoft Online Help system—the foundation of online documentation systems still in use today—and wrote programming reference manuals for Microsoft Word and Word for Windows.
